

# keruve can be of great help to them

Different models for men and women

## Keruve is an effective solution to the problem of wandering and the risk of a person with Alzheimer's going missing in the street.

### **Avoid them going missing**

With the Keruve it is very easy to find them in case of wandering.

### **Help maintain their independence**

It lets them keep going for walks and socializing with other people.

### **Peace of mind for all the family**

If they get delayed, the family can always see where they are and go and look for them if necessary.

### **Improves quality of life**

It reduces stress and anxiety of the caregiver and the people with Alzheimer's.

Keruve consists of a discreet watch with a safety lock for the person with Alzheimer's and a portable receiver for the family.

With only the push of a button, the family member can locate them rapidly, without distance limits and middlemen.

We also offer the option of locating the Keruve watch from an iPhone, Android, Windows phone or any type of cellphone. You can purchase the complete Keruve locator and allow other family members to locate the watch with their cellphones or purchase only the watch and receive in text messages (SMS) the locations on your cellphone. This option allows you to receive exact locations but not receive alerts or complete configurations that are possible with the Keruve receiver.

## Why choose keruve?

**It's discreet.** Thanks to its design in the watch format and the availability of various watch models, Keruve goes unnoticed and has a high level of acceptance by people with Alzheimer's.

**It's reliable.** It's used by thousands people worldwide. It permits you to set a security area and has 4 positioning systems.

The watch is water resistant and shock resistant. The watch battery has autonomy of 3.5 days.

**It's easy to use.** It is delivered with a receiver, the use of which is very easy and intuitive. Keruve is delivered ready to be used.
